Division of Space
Intersection Stack/Slide

Environments influence the attitudes of the people who are in them. Good ones will foster innovation, productivity and communication. Poor ones will be a drag on those things. Intersection Stack and Intersection Slide Divider Systems from Corona Group combine glass, porcelain, decorative glass, acoustic panels even metal mesh into architectural elements that open and close off areas.

They empower your people by helping them to focus, capture and share ideas more efficiently. They can make your environments work harder. And be more agile. Here are some of the ways it's done.

Intersection Slide

Available as a Top-Hung Single or Multi-Track System attached to a Header, in Glass, Porcelain, Acousticolor, Fabric, Wire Mesh or Perforated Steel. Shown with Custom Decorative Glass Panels in Anodized Aluminum Frames.
