

Porcelain Media Walls

Porcelain Media Walls VIP/VIP+

> Porcelain Media Walls come in VIP and VIP+ configurations. Utilize either configuration, add your video display and you create a presentation system that can handle just about every type of media in almost any environment.

> The **VIP Media Wall** incorporates the standard VIP Rail System. Rails are designed to mount directly to the wall. The 6cm wide aluminum profile creates an unbroken, horizontal line while keeping all boards and flip charts in order. Steel ball bearings are fitted inside the top rails making it easy to hang and take down loose sheets of paper without damage. And depending on the top rail configuration, you can create a two or three level presentation wall by adding additional component boards. These boards hang and slide in the top track and hide the video display for dramatic effect.

> The **VIP+ Media Wall** utilizes the larger VIP+ Sliding Rail System. VIP+ configurations are ideal for large classrooms and conference rooms, and also can create multi-level presentations using wall mounted porcelain boards and heavy duty sliding rails. Combine with oversized VIP+ Series Component Boards, and you have larger than ever, superior surfaces perfect for writing, projecting and hiding media.

Frames are matte anodized aluminum. Boards are also available in glass, fabric even 100% recycled rubber.

Finish:

Anodized aluminum frames; various board finishes.

note: Single and Double Rails include ball bearings for paper hanging.
Concealed Mounting hardware is included. Custom sizes are available.
