

Intersection Message Center

Intersection Message Center

- > The Intersection Message Center is a unique application that combines our Intersection system, glass or porcelain markerboards, and a custom painted Peg Board.
- > The rails and dividers utilize 1" Intersection frames, in anodized satin aluminum or black powder coating.
- > Available with Magnetic or non-magnetic glass or CPS Porcelain Steel markerboards.
- > Custom Peg Board can match almost any specified color.
- > Enhancements include wooden shelves and mesh grids for attaching clips.
- > Mounts directly to the wall with included concealed mounting brackets.
- > The Intersection Message Center can add multiple communication options for specific group settings, huddle spaces and benching groups.
- > As shown: 69" w x 72" H. Black powder coated frames, non-magnetic glass, open wire mesh grid, wooden shelves with custom stain and peg board with custom match paint.
- > Contact Corona Group Inc for more information and available options.
