Technology, design and perfect ergonomics

THE COMPANY

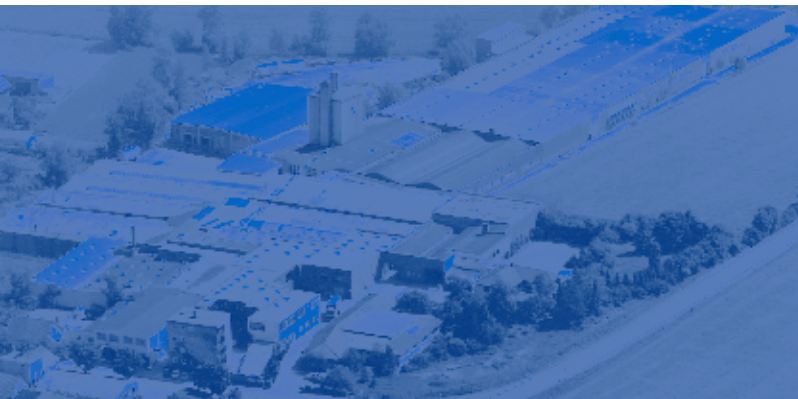

LEUWICO GmbH & Co was established in 1923.

The spectrum of the performance has been increased considerably during the past years: from a pure manufacturer and supplier of furniture to a full service supplier.

The result for the customer is a turn-key furnished office and full service from planning to post-sales service.

With systems that meet all technical, spatial and organizational requirements.
With work platforms that help motivate employees and protect health.

The central focus of the company is high-quality computer work stations which combine sophisticated technology, design and ideal ergonomics.

Our production covers:

- complete metal and wood machining
- surface finishing like powder coating and painting
- quality inspection, acceptance and assembly
- packaging and shipping.

production area approx. 30.000 sqm

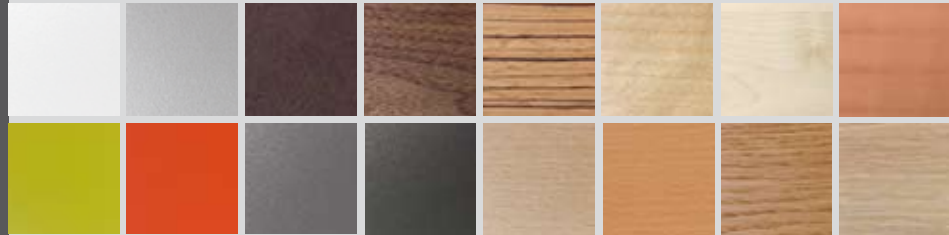

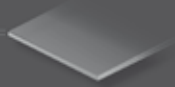

imove^F

Sophisticated design, sit/stand function and perfect hardware integration – this is iMOVE F, a high-quality furniture system. The “F” in the name stands for “frame” and describes the rectangular metal frame of the side parts that gives the system a light appearance and a characteristic profile. The ergonomic manual height adjustment enables the quick and comfortable adaptation to individual body heights and changing working positions. In 2010 the furniture system iMOVE F won the “Focus in Silber”, in 2011 the renowned “red dot design award” and it will also be appointed for the “Designpreis Deutschland 2012” (German Design Award) this year.

35 mm

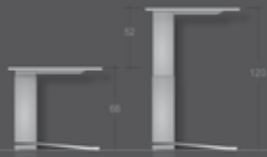

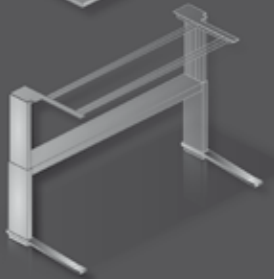

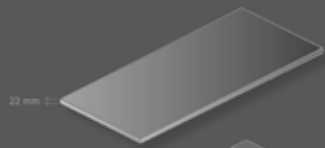

leuwico

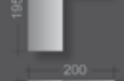

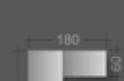

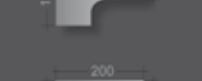

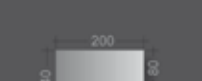

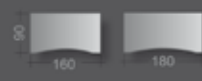

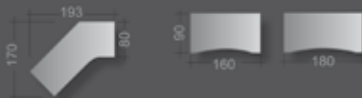

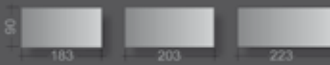

imove^c

The “C” stands for “column”. A curved foot bar supports the column profile. With the ergonomic height adjustment the work level can be moved up to a standing working position in only a few seconds. This furniture system allows for various configurations. The cable management and the technology integration has been exquisitely solved. Pedestals, caddies or lowboards with a harmonised design offer the required storage space for each workplace.

leuwico

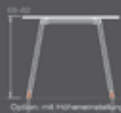

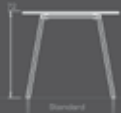

tune

An up-to-date, high quality office furniture system with simple and clear shapes. The desk top seems to float over the desk frame, corner connections are available in matching or contrasting colours marks the distinctive characteristic of this furniture system. The modular construction as well as the wide range of finishes for desk tops and frames and storage enable creative arrangements for all types of offices.

leuwico

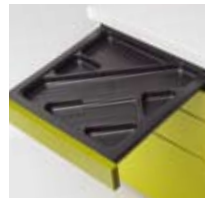

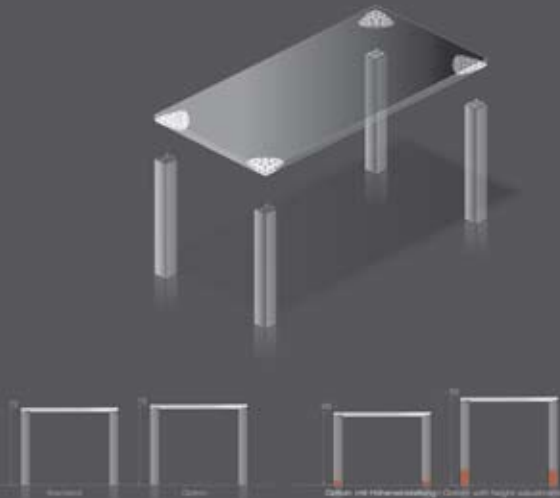

A harmonised design reduced to the essential parts and a selection of finest finishes provide a perfect appearance for highest demands.

Whether in the executive offices or conference rooms the desk reinvents its prototype – four feet and a top. With balanced proportions and fine surfaces an iONE desk will become the central point of each room.

Material combinations of mirror finish with noble natural wood surfaces or the modern coolness of crystal white accentuate the crispness of the system.

Various sizes of work tops up to a maximum size of 240 x 100 cm as well as combinations of desks and sideboard create exemplary office environments.

iscube

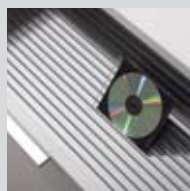

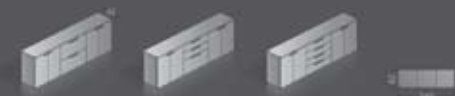

The straight architectural nature of iSCUBE cupboards and sideboards deliver a clear message of organisation and tidiness in every stylish office.

A choice of up-to-date colors and materials provide for sophisticated office furnishings. The stringent cubic design of this cupboard system harmonizes best with the iMOVE, iONE and tune and create a classy work environment.

Colours and materials including selected natural wood surfaces can be combined perfectly.

Floating doors and gliding drawers conceal pure functionality: organizational trays and filing frames are a few of the various options available.

leuwico

GO²move

The ergonomic GO² system is a suitable furnishing solution across all departments of a company due to its wide range of shapes, sizes and functions:

modern height adjustable workstations as well as conventional desks, a modular system with extensive worktop shapes and configurations. The system provides multiple methods for cable and technology integration: whether single offices, open-space offices, conference or meeting rooms, GO² offers a solution.

A comprehensive selection of accessories, colors and surfaces give room for a wide scope of creativity. Mobile caddies, pedestals and shelving systems make the offer complete.

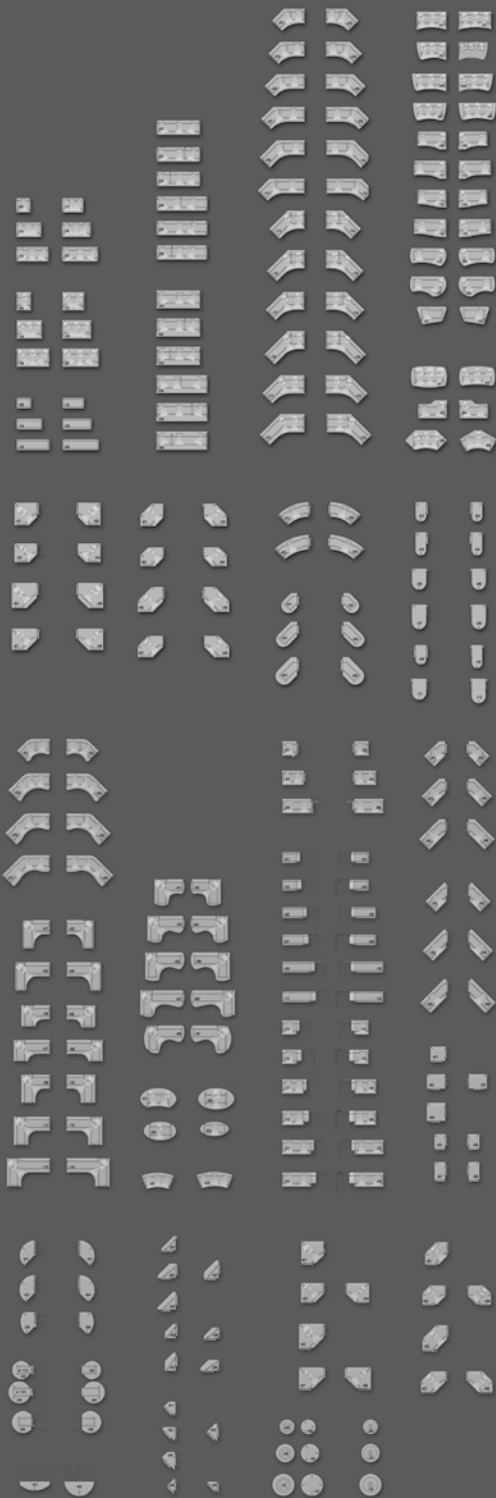

GO²shape

Multifunctional and simple basic construction with an extremely wide range of design varieties, work top shapes, configuration and upgrading possibilities.

leuwico

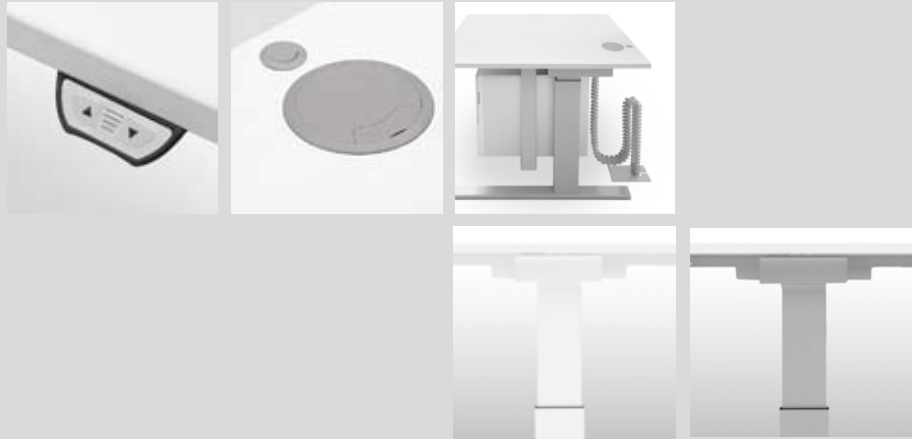

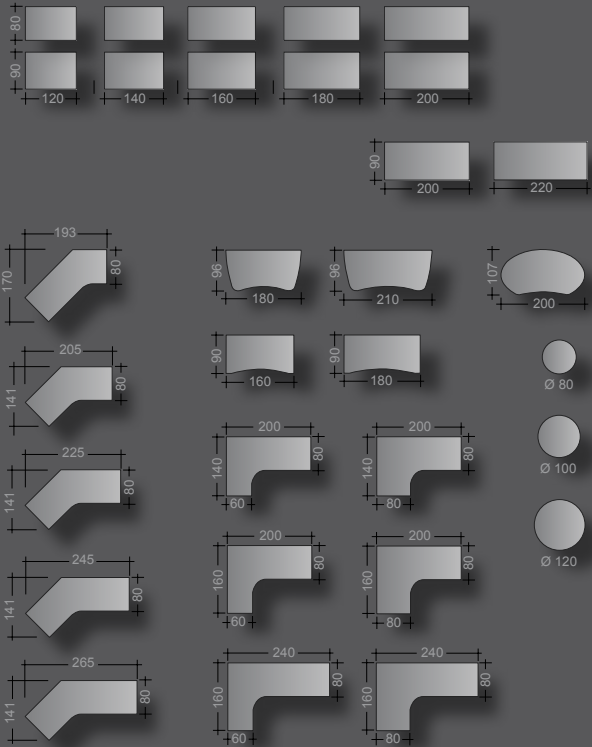

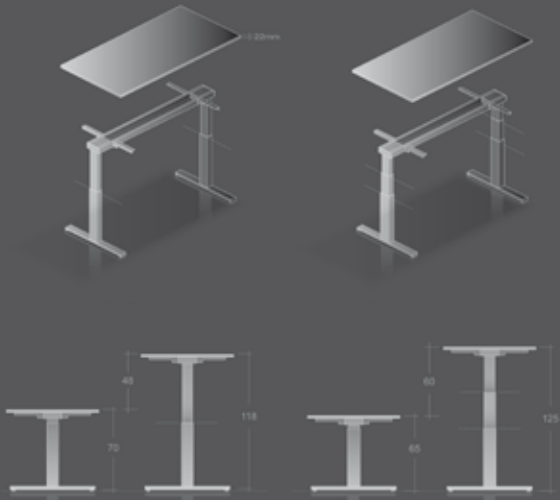

Spine²

A basic and cost-effective sit/stand desk system with motor-driven height adjustment mechanism: SPINE² - compared with other ergonomic office furniture in the mid-range price segment - offers a wide range of worktop shapes. We offer angled desks with large surfaces without height adjustment restriction. Due to the clear design of this furniture it can be well combined with existing furniture and our cupboard systems.

CPU stands and a secure cable management make the integration of technical equipment easy. Colors and surfaces are up-to-date. Caddies, pedestals as well as cupboard and shelving solutions provide for the necessary storage required at the workplace.

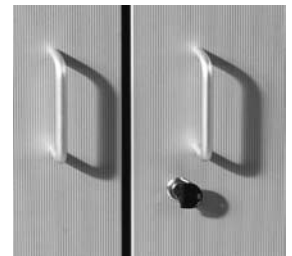

leuwico

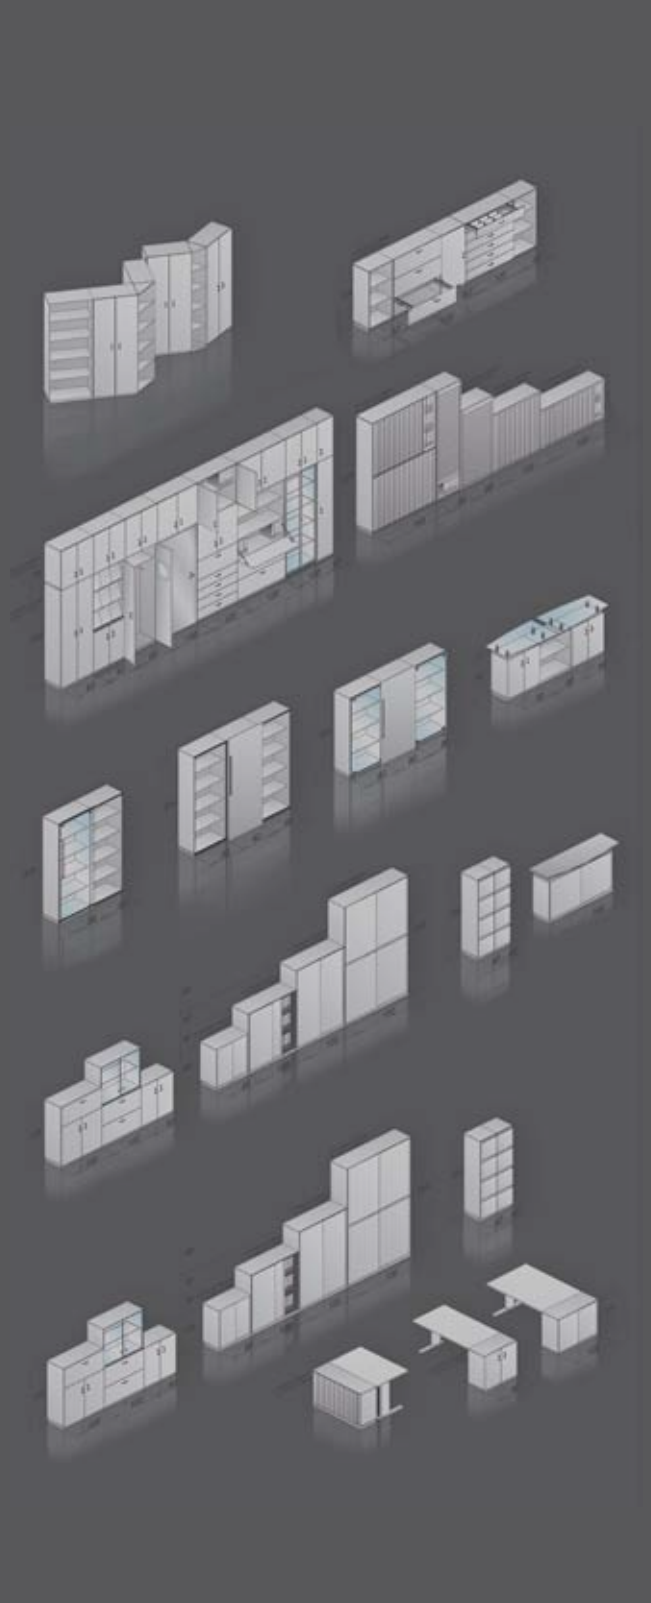

scube

Functional, elegant, cost-effective: A complete system – modular, extendable at any time for a large variety of applications: wall units, closets, counters, side-boards and any kind of cupboard variations with classical tambour fronts, hinged doors and sophisticated sliding doors. Room-high cupboards with up to 7 rows of files as well as small mobile units with casters are available. Fronts and interiors are freely selectable and are designed for comprehensive functional office environments.

Colors and materials match with all our other system ranges – aside from the classical surfaces we can offer frosted glass with aluminum frames and doors, shelves and top plates made of clear glass.

ideal

trading desks

The name Leuwico represents innovative design and elaborate solutions; more than 100.000 monitor work places installed and 40 years of experience are convincing reasons to entrust your project to our care.

Flexibility and ergonomics are the main characteristics and advantages of Leuwico solutions. The modular system enables a competitive and customised realisation in different kinds of design and comfort. This construction offers a quick installation and guarantees an easy adaptation to constantly changing technical requirements. Our aim remains constant: high quality and satisfied clients.

control room desks

As experienced specialists for sophisticated monitor work stations we make it our business to provide you with perfect solutions which fulfil your requirements. Beyond our experience and high quality system components we can offer an optimised tailor-made solution at an interesting price.

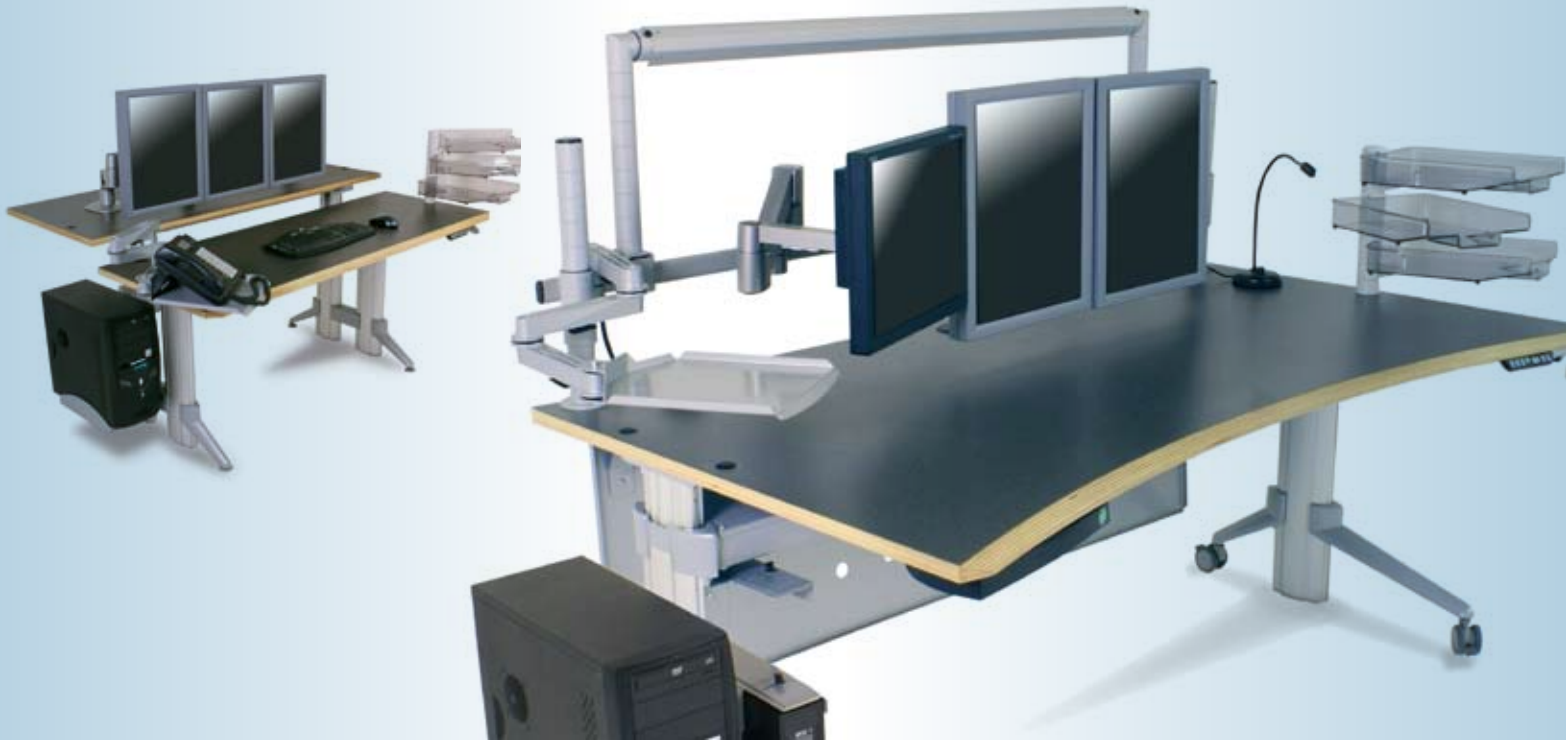

The mental and physical impact on Control Stations personnel is enormously high. Therefore, it is necessary to create a working environment that is as ergonomically correct as possible.

Ergonomists recommend workcenters providing height adjustable components which can be adjusted easily to different users, tasks and habits.

We shall be glad to discuss all details personally with you.

PACS workcenter

[Picture Archiving and Communication System Work Places]

The multi-monitor PACS workcenter take a central role in the communication structure of the modern medical enterprise. Together with radiologists and our ergonomic expertise, Leuwico has carried out thorough research on the design of an ideal workcenter for the radiologist. We are proud to announce the result; the next generation workcenter for Soft Copy Reading, the complete solution for your reading room. Detailed design and accentuation of the basic structure, a variety of sizes and shapes as well as height adjustable components characterise our ergonomic PACS workstations.
